# **MORE LEARNING, LESS STRESS**

## **PROFESSIONAL DEVELOPMENT DONE WELL.**

Education is all about advancing the long-term flourishing of people by guiding them into ever-deepening levels of mastery. So: how do we do that?

### **Student Motivation**

**Student apathy is *not* a fixed trait.** Focus on the science and interventions that matter most for improving student motivation.

### **Literacy Essentials**

**Literacy is a means *and* an end.** Strengthen whole-school literacy initiatives in a way that enhances (rather than sacrifices) content mastery.

### **Sustainability**

**Teachers *deserve* to focus.** Emphasize "smarter not harder" strategies that improve long-term student *and* teacher flourishing.

Dave is a **practicing classroom teacher** who has delivered over 125 professional development experiences in 30+ states and overseas. Give Dave a chance to lead a workshop, give a keynote, or run breakout sessions at your next PD day!
